Sensibilities — transmedia installation

Technical rider

requirements

4 fullHD multimedia monitors (at least 24" recommended) with USB port and headphones out. Each monitor plays one looping video, reading from a USB flash drive.

5 good-quality headphones (ex. Audio-Technica ATH-M40)

2 devices (+ charger) capable of playing a looping mp3 file and sending it via Bluetooth. Ex. smartphone, tablet. The suggested app to play the file is VLC.

1 device (+ charger) with headphones out, capable of playing a looping wav file. The suggested app to play the file is VLC. Ideally, this device should be invisible or covered by some neutral material (e.g. a white or black cloth). It should be inaccessible to the audience.

4 AC 230V for the monitors + 3 for the devices + 1 for the black box (provided by the author)

site-specific elements

This installation was conceived to be adapted to the available location. I need at least one full day to install all the elements, choosing how to dispose them in space. Ideally, I will try to incorporate site-specific elements such as tables, surfaces, walls, columns. Technical assistance and practical help is needed, during the time of the preparation.

However, the following materials are usually needed:

- 4 tables, either white or black, about 80 x 120cm (height 75cm)
- 6 chairs, either white or black
- a wall, or a column
- 4 LED spotlights with tripods

recharging between opening hours

The following elements have to be recharged between the opening hours of the exhibition:

- 1 iPad (AC 230V)
- 2 Bluetooth portable speakers (USB to computer)
- 1 camera battery (AC 230V)

Once a day, the black cloth covering the box has to be sprayed (right under the hole, on the internal side) with a sample of “Chanel N° 5 L’Eau”. One spray is more than enough.

The installation can run for about 4 hours, before needing to be recharged. In case of longer opening hours, the iPad can be plugged permanently, and a replacement battery for the camera can be provided. The Bluetooth speakers can last a whole day.
